

Easy Outdoor Lighting Control

A simple and energy-efficient solution

Gaash Lighting offers a variety of solutions for the command and control of street lighting luminaires, which contribute to energy efficiency and savings.

Easy Control is an easily implemented solution, requiring no investment in infrastructure, based on a smart driver preprogrammed according to customer needs.

The luminaire will automatically operate according to the scenarios defined with the customer, providing a comprehensive response to the lighting needs at the site.

Why easy control?

- ▶ Immediate savings in energy consumption.
- ▶ No special infrastructure required.
- ▶ Easy installation - no communication lines or controllers necessary.
- ▶ Rapid and worthwhile return on investment.
- ▶ Electronic components from Phillips, lifespan of 100,000 hours.
- ▶ Flexibility in determining the luminous intensity based on predefined scenarios, for example:
 - ▶ Between the hours of 00:00-04:00, the luminous intensity drops to 50%, whereas at roundabouts and intersections it only drops to 80%.
